Dear Trend Micro Hiring Manager committed,

This is Hugo ChunHo Lin, a 4th-year student at National Central University, fueled by a sincere passion for the field of Software Engineering . I am reaching out to express my keen interest in the "Software Development and Test Intern" position at Trend Micro . The primary aim of this letter is to underscore my qualifications as a strong candidate for Trend Micro and convey my expectations regarding the company. I firmly believe that my skills and experiences closely align with the prerequisites for this role.

Currently, I am working as a Cloud Engineer Intern at eCloudValley, with a focus on building hybrid cloud application architectures using AWS and Azure. Additionally, I am preparing for the SSA certification. During the summer between my third and fourth year of university, I am software engineer intern at Pegatron. During this time, I developed a software project called "Smart Robot, Smart World", which involved controlling a virtual robotic arm through text and voice commands. I presented this project to the CTO and received second place in a project competition. Subsequently, I served as an AWS Campus Ambassador during the forth year, where I promoted cloud computing to over 700+ attendees and developed a Serverless Line Bot using AWS services.

Throughout my academic journey, I continuously enhanced my software development skills. Particularly in my senior year, I delved into web application development and self-taught the GO language. I also audited the graduate course "The Attack and Defense of Computers," where I learned about pwn and web-related attacks and defenses such as stack overflow and command injection. Additionally, I developed a TCP protocol anonymous chatroom using sockets during my spare time.

As an intern, I am not only committed to fully engaging but also to maintaining motivation for learning even after the internship. I am eager to learn from experienced professionals, work collaboratively with team members, and contribute ideas to meaningful projects. I am self-disciplined, a quick learner, detail-oriented, and can work effectively under pressure.

Thank you for considering my application. I would be honored to have the opportunity to discuss my qualifications further and learn more about the position.

Kind Regards,

*Hugo ChunHo Lin*
